Woven™ Stainless Steel Mesh

*The Environmentally friendly
Cost Effective
Termite Barrier System*

What is Woven™ Stainless Steel Mesh

- Woven™ Stainless Steel Mesh is a termite exclusion system that protects your property and your investment, when used as a termite defence system for your new home or building.
- A system that upon correct application will not corrode or rust, in any environment especially when placed around slab penetrations and building perimeters providing protection for the life of the structure. (subject to warranty conditions)
- Woven™ Stainless Steel Mesh is manufactured from high grade corrosion resistant 316 stainless steel mesh and coated with our proprietary rust inhibiting sealer for further protection
- Can be used in almost any building situation or Architectural detail.
- Stainless steel mesh has been used in over 260,000 new homes in Australia alone.
- Meets requirements of Australian Standard 3660.1.2000 Section 6
- Complies with Building Code of Australia Page 120-121 table 3.1.3.1 – Acceptable termite barriers
- Installed by fully trained and licensed installers
- Codemark Approved SAIG-10-20035
